Experience

Philips Healthcare Bengaluru, India
Software Technologist Nov 2025 – Jul 2026

- Implemented a major architectural upgrade of Pregnancy+ Android, moving from a mother-centric model to multiple pregnancy and baby profiles.
- Redesigned database structures and data classes across the app to support the new multi-profile architecture.
- Migrated legacy Parse-based persistence to Room as part of the end-to-end app and data model overhaul.

Wayo (BluSmart) Gurugram, India
Senior Software Engineer – Android Jun 2024 – Apr 2025

- Developed and launched the wallet module with an end-to-end withdrawal flow.
- Implemented transaction history and secure bank account linking within the wallet experience.
- Introduced Jetpack Compose, migrating approximately 35% of the UI from the existing implementation.

Loco Bengaluru, India
Software Development Engineer – Android Mar 2022 – Nov 2023

- Built Loco Clips, a short-video feature, from scratch; reached 100K+ unique users.
- Implemented video trimming and upload flows supporting 3,000+ uploaded clips, alongside feed autoplay.
- Integrated banner ads across the app to support monetization.

Amar Ujala – Safalta.com Noida, India
Android Developer Apr 2021 – Mar 2022

- Improved app reliability, increasing crash-free sessions from 96% to 99%.
- Developed and launched mock tests used for 60,000+ test completions.
- Improved video playback performance and reliability; video views increased 25%.

Projects

Steadyline – Bipolar Mood Tracker Website | App Store | Google Play
Native Android and iOS apps; Kotlin Multiplatform shared core

- Built and launched Android and iOS apps for mood, sleep, and medication tracking, used by 1,000+ users.
- Shared business logic through Kotlin Multiplatform; built offline storage and cloud sync that preserves conflicting edits.
- Built Ask SAM to answer questions from saved health logs, with AI opt-in, local answers, and server-side usage limits.
- Built AI-ranked insights from health history and a correlation view for tracked factors and next-day comparisons.

Technical Skills

Mobile: Kotlin, Java, Swift, Jetpack Compose, SwiftUI, Kotlin Multiplatform
Architecture & data: Coroutines, MVVM, Hilt/Dagger, Koin, Room, SQLDelight

Education

IET MJP Rohilkhand University 2015 – 2019
B.Tech., Electronics and Communication Engineering Bareilly, India
